

Course Overview

BING4316 (Morpho-Syntax's Printed Material) consists of 9 modules, comprising wit theories and exercises on word formations. This learning material also explores subjects related to the introduction to morpho-syntax, words, morphemes, morphological process phrases, clauses, and tree diagrams.

After learning this subject, students are expected to understand how to arrange words in the English language correctly. Thus, your writing skills hopefully can be improved.

Each module is accompanied with some exercises that help students in arranging the English words correctly. It is also equipped with answer keys of exercises as a means of measuring students' success in doing exercises so that they can learn their mistakes.

Students are recommended to understand the instructional objective of each module then do the exercises given. When finished reading the module, students are allowed to do the Formative Test without turning over the answer keys. This is to see how much students' ability to understand the modules.

In conclusion, the author hopes that the learning materials can be useful for students to improve their ability in setting of word formation in particular and the formation of sentences in general.
