Contents

Course Overview vii

Module 01 1.1
Regression Theory

Learning Activity 1 1.4
Drawing A Regression Line

Learning Activity 2 1.24
Regression Analysis

Module 02 2.1
Regression Analysis

Learning Activity 1 2.4
Simple Linear Regression

Learning Activity 2 2.19
Coefficient of Determination

Learning Activity 3 2.27
Correlation Coefficient

Module 03 3.1
Multiple Regression

Learning Activity 1 3.4
Multiple Linear Regression

Learning Activity 2 3.21
Type of Regression Analysis

Module 04 4.1
Inference in OLS Regression

Learning Activity 1 4.4
Regression Parameter Testing and Confidence Intervals

Learning Activity 2 4.20
Coefficient of Multiple Determination and the Use of SPSS

Module 05 5.1
Assumptions in Ordinary Least Squares Regression

Learning Activity 1 5.4
Assumptions Underlying of Ordinary Least Squares Regression

Learning Activity 2 5.15
Classical Assumption Test and the Use of SPSS

Module 06 6.1
Time Series Analysis

Learning Activity 1 6.4
Time Series Analysis and Linear Trend Analysis

Learning Activity 2 6.22
Non-Linear Trend Models

Learning Activity 3 6.42
Decomposition Method

Module 07 7.1
Chi Square

Learning Activity 1 7.4
Chi Square Concept

Learning Activity 2 7.17
Goodness-of-Fit

Learning Activity 2 7.22
Homogeneity Test

Module 08 8.1
Bayes' Theory

Learning Activity 1 8.4
Probability for Various Events

Learning Activity 2 8.11
Bayes' Theorem

Module 09 9.1
Decision Theory

Learning Activity 1 9.4
Decision Making under Uncertain Conditions

Learning Activity 2 9.18
Decision Making under Risky Conditions

Greek Letter Reading Instruction 9.36

Author's Profile 9.37
